Risk Solutions, BDA
ASHRM Annual Conference: Bermuda luncheon
Monday, October 8, 2018, 11:30am
City Winery, Nashville, Tennessee

Good afternoon, everyone. It's my pleasure, on behalf of the Bermuda Business Development Agency, to welcome you to the Annual Bermuda Market Luncheon.

My name is Caitlyne Lindo, and I'm a member of the BDA's Business Development Team.. Our agency is an independent, public-private unit that works to encourage foreign direct investment and help global companies start up, re-locate or expand their business on the island. We also work closely with established companies in Bermuda to foster an environment for economic growth and job creation.

My work focuses on what we call the "Risk Solutions" sector, which covers the four major areas of our market: reinsurance, insurance, captives, and insurance-linked securities or ILS.

As most of you will know, Bermuda is the second-largest re/insurance hub after London. We're also the single most important property and catastrophe market; the largest captive insurance market; and the largest depository of global ILS listings. Most of all, we're recognised for taking an innovative approach to tackling emerging risks—and increasingly, those revolve around cyber—and healthcare...which is what we're here to highlight today.

We have some key industry stakeholders from the Bermuda Healthcare market. I'd like to take a moment to ask them if they could quickly raise their hands.

If you have any questions regarding the Bermuda market, or its healthcare-liability solutions, please feel free to connect with one them, or me, . You can also follow up with anyone on our team our BDA website: bda.bm

Please enjoy your lunch! And now I'll turn it back over to Shelle...
